
1 Contract graph
allowance layer
transfer layer
Nodes: contracts only, the same in both layers
Edges: the 12 months before a freeze; an allowance counts up to the owner's balance
2 Scores
BOTH LAYERS
C-PR the method
S-PR ablation
ONE LAYER
EndorseRank
AWP
BASELINES
Raw counts
RQ1 Same window
How far EndorseRank and AWP differ (H1); each score against checks of its own edges (H2); cost (H3)
RQ2 Discovery order
A crawl ordered by C-PR against breadth-first order and the contract backlink count
RQ3 Out of window
W0 and W1: each walk against the raw count it smooths, on later approval pairs and senders
RQ4–5 Rules for C-PR
Rule A: C-PR against its layers walked alone. Rule B (F1, F2): allowances added to the transfer walk
