The web

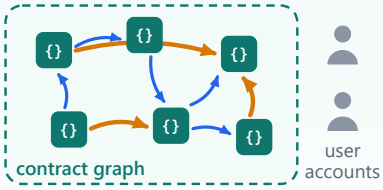

Nodes	pages
Edges	hyperlinks
Rank	PageRank: by the pages that link to a page
Crawl	ordered by PageRank, it reached the hot pages sooner than by backlink count (Cho et al., 1998)

Ledger walks over transfers

Nodes	all addresses, user accounts included
Edges	transfers
Rank	PageRank and HodgeRank on transactions; AWP weights a transfer by value and age
Unread	allowances

This thesis

Nodes	contracts only; user accounts outside every graph
Edges	transfers and allowances, each allowance counted up to the owner's balance
Rank	C-PR walks both; EndorseRank the allowances, AWP the transfers
