S1 Table. Windows, cohorts, graphs and amounts.

	Same window (matched cohort)	W0	W1
Windows			
Scores frozen at	30 Jun 2026, 23:59:59 UTC	31 Mar 2026, 23:59:59 UTC	30 Jun 2026, 23:59:59 UTC
Events behind the scores	1 Oct 2023 – 30 Jun 2026	1 Oct 2023 – 31 Mar 2026	1 Oct 2023 – 30 Jun 2026
Labels counted	–	1 Apr – 30 Jun 2026	1 Jul – 30 Sep 2026
Contracts scored			
Matched cohort	15,107 (of the plan's 27,844)	–	–
Spender cohort	–	17,050[a]	18,152
gained ≥ 1 new approval pair	–	2,070	1,616
gained ≥ 1 new transfer sender	–	1,695	1,533
Trader cohort (GMX V2 contract accounts, ≥ 3 closes)	–	88	70
recipients (in-approve degree above zero)	–	40	37
highest in-approve degree	–	3	1
traders with ≥ 1 liquidation	–	12[b]	9
traders with every close liquidated	–	not recorded	1
Graphs (five tokens, ego network of the matched cohort)			
Allowance graph, nodes / edges	6,221,665 / 11,210,114	– / 10,650,258[c]	as same window
Transfer graph, nodes / edges	7,884,602 / 25,001,216	– / 23,680,692[c]	as same window
Cohort contracts outside the allowance / transfer / both graphs	523 / 2,670 / 80	–	–
Events and amounts			
Approval logs kept (share of the plan's ego extraction)	224,954,202 (57.7%)	–	12,209,894 in Jul–Sep
Transfer logs kept (share of the plan's ego extraction)	1,149,168,538 (74.7%)	–	60,182,192 in Jul–Sep
Positive latest allowances at the anchor	12,590,613	–	–
unlimited	5,763,757 (45.8%)	–	–
worth at least the cap U	6,776,289 (53.8%)	–	–
Owners with a positive latest allowance	6,208,769	–	–
Medians m_T / m_A and cap U (USD, from events up to t_1)	200 / 62 / 20,000		

Revised analysis: approvals and transfers of WETH, USDC, USDT0, ARB and WBTC, amounts in US dollars at DefiLlama daily closing prices. Every scored address holds contract code; externally owned accounts enter the graphs only as owners, senders and recipients. The W1 scores are the same-window scores. W0 and W1 share their score data up to 31 March 2026, and the W1 score window contains the W0 label window. [a]Of 17,167 spenders with a positive latest allowance of one of the five tokens at the freeze, 104 had no code and 13 an EIP-7702 delegation designator when read with `eth_getCode`; both groups are externally owned accounts and were left out. [b]Not stored as a count: every one of the 40 recipients and 75.0% of the 48 other traders had no liquidation, which leaves 12 traders with at least one. [c]Owner–spender and sender–recipient pairs in the pair tables at the W0 freeze, counted before pairs whose value weight is zero in floating point are dropped; node counts at that freeze are not recorded.
