W1 and W0 share their scoring data from 1 December 2025 to 28 February 2026, and W1's scoring window contains W0's label window. All 5,521 seed wallets were selected on closes up to 31 May 2026, which for W0 includes its label window. The W1 transfer graph has 30,791 nodes and 137,087 edges; the transfer graph at the W0 freeze is not summarized here. The 1,964 W1 spenders include the one node whose only incoming allowance is from itself; it has no in-edge once self-loops are removed, which is why the graph counts 1,963 nodes with in-edges. ^aOne of the 161 EOAs delegates to contract code under EIP-7702. ^bTaken from the spring spender lookup; a recipient outside the spring spender cohort is recorded as unknown. Traders that are not recipients were not classified.
