S1 Table. Windows, cohorts, graphs and amounts.

	Same window (matched cohort)	W0	W1
Windows			
Scores frozen at	30 Jun 2026, 23:59:59 UTC	31 Mar 2026, 23:59:59 UTC	30 Jun 2026, 23:59:59 UTC
Score window (events behind the scores)	1 Jul 2025 – 30 Jun 2026	1 Apr 2025 – 31 Mar 2026	1 Jul 2025 – 30 Jun 2026
Labels counted	–	1 Apr – 30 Jun 2026	1 Jul – 30 Sep 2026
Contracts scored			
Cohort of the freeze (≥ 3 owners on the five tokens in the score window)	6,483 (matched cohort, of the plan's 27,844)	6,343 (W0 cohort; 5,383 also in the matched cohort)	as same window
Spender cohort	–	7,914[a]	7,960
gained ≥ 1 new approval pair	–	1,732	1,495
gained ≥ 1 new transfer sender	–	1,422	1,371
Trader cohort (GMX V2 contract accounts, ≥ 3 closes)	–	87	70
recipients (in-approve degree above zero)	–	39	37
highest in-approve degree	–	3	1
traders with ≥ 1 liquidation	–	12[b]	9
traders with every close liquidated	–	not recorded	1
Graphs (five tokens, ego network of the freeze's cohort in its score window)			
Allowance graph, nodes / edges	2,514,846 / 3,808,949	– / 4,117,103[c]	as same window
Transfer graph, nodes / edges	3,603,300 / 8,426,124	– / 9,198,965[c]	as same window
Cohort contracts outside the allowance / transfer / both graphs	191 / 1,192 / 30	–	–
Events and amounts			
Approval logs kept (share of the plan's ego events in the same window)	85,986,562 (63.3%)	–	12,200,682 in Jul–Sep
Transfer logs kept (share of the plan's ego events in the same window)	442,722,039 (76.2%)	–	58,625,425 in Jul–Sep
Positive latest allowances at T_{obs}, set in the score window	4,185,287	–	–
unlimited	2,084,669 (49.8%)	–	–
worth at least the cap U	2,331,420 (55.7%)	–	–
Owners with a positive latest allowance	2,508,872	–	–
Medians m_T / m_A and cap U (USD, from the W0 score window)	170 / 100 / 19,000		

Revised analysis: approvals and transfers of WETH, USDC, USDT0, ARB and WBTC, amounts in US dollars at DefiLlama daily closing prices, every score from the twelve months before its freeze. Every scored address holds contract code; externally owned accounts enter the graphs only as owners, senders and recipients. The W1 scores are the same-window scores. The score windows of W0 and W1 overlap from July 2025 to March 2026, and the W1 score window contains the W0 label window. [a]Of 7,962 spenders with a positive latest allowance of one of the five tokens, set in the score window, at the freeze, 39 had no code and 9 an EIP-7702 delegation designator when read with `eth_getCode`; both groups are externally owned accounts and were left out. [b]Not stored as a count: every one of the 39 recipients and 75.0% of the 48 other traders had no liquidation, which leaves 12 traders with at least one. [c]Owner–spender and sender–recipient pairs in the pair tables at the W0 freeze, counted before pairs whose value weight is zero in floating point are dropped; node counts at that freeze are not recorded.
